The app's download link will be redirected to the official App Store site, so the app is genuine and has n't been changed in any way. Got it Update's latest Google keyboard has added new features, after previously Google has added sundanes language éjahan now the latest update to Google Keyboard, Google added sundanes script layout, making me personally surprised really. Usually before I update the application ala application delete first so if you want to install it must be fixed again and as usual after the update I usually add sundanes language éjahan because emang often ala pake sundanes gesture function. As surprised ala when you want to add sundanes language has 2 options, after you added and I try one of them berlayout Sundanes script, this feature, I think is useful considering Google always upgrade every time their application updates, but not rarely ala they remove the function of the application, but hopefully ajh layout sundanes script tetep persists because users like ala this feature should often use this feature. Assalaamu'alaykum Alhamdulillah, we were able to re-create the post, after previously we long not taken due to the busyness that struck. And in this post, none other than.. we will explain in different ways, namely How to write Sundanes Script for Android Oke, let's go directly into the language. In general, all the latest types of Android are already installed in it Sundanes fonts. Well let's check can your Android display the Sundanes script below? If it looks like you don't need to install it again, but if it's invisible, it means you have to follow how you install Sundanes Fonts on such android. 1. Must have HP ANDROID Already identified items, the number 1 all you need to do is his HP. If you don't, what the world says. 2 the most important thing is, Root. Root is an action operation that will be able to open all access to HP Android system. 3. DOWNLOAD iFont application After android system on your phone is successfully rooted, then the next step is to download the font application instead of iphone. Why download this app? Because without this app, you can never install or install all sorts of fonts forever, including these Sundanes fonts. 4. DOWNLOAD FONT SUNDANESE SCRIPT Well this is the most important thing, download the Sundanes font and pair it through the iFont application. Uh where you downloaded min...? Already downloaded, follow these steps. Open the iFont app, that's the original view. Select a tab that says MY (if you speak English) Then it definitely looks empty, but don't worry, just click on the red writing that says Click This. Select the folder where you saved the downloaded font if you found it, it will look like this, select the downloaded font, and then follow the next steps by clicking SET, and then clicking OK and install. Wait a while and it is already installed. Now try to verify it is able to write using sundanes script? Now all you have to do is 1. Download Sundanes Keyboard Application at Playstore 2. Directly install the Sundanes Keyboard Application 3. Once installed, open the Sunda Script Keyboard 4 app. Click Paké, then choose the Sundanes Script Keyboard 5 input method. Congratulations, now you can write a Sundanes script for HP Android Sekian that we can share, hopefully useful and unfortunate if there is wrong kata2. Hehe Wassalaamu'alaykum Assalaamu'alaykum Dulur Thank you for clicking on this article, you are very useful to visit Blog ASB, Sundanes Script Baku. Because on this blog God wishes you will find a lot of inspiration from the Sundanes script. And in this post, we will provide an explanation for Rarangkén. All right, let's go on with that... A. Understanding Rarangkén What is Rarangkén? Rarangkén is a system or rules for writing and reading Sundanes script (vocalizations) which contains different types of sound rules. Or in conclusion Rarangkén is the rule that governs the use of sundanes script. Rarangkén has 3 different types, including: 1. Ngarobah Ngarobah or change is the most important part of Rarangkén, this type of function is to change the basic Ngalagena vowel sound, which originally reads / / . 2. Ngasupkeun Ngasupkeun or Insert your function to insert ngalagena sound into the base ngalagena. 3. Nganambahan Nganambahan or Add your feature to men Assalaamu'alaykum Dulur Alhamdulillah, again we will update sundanes language learning article and this time we will discuss about Learning Sundanes Ngalagena script or consonants. All right, let's start the lesson. A. Understanding Ngalagena Ngalagena sundanes consonants order to read / / . B. Differences in ngalagena B1. The consonants of the Sundanes script are very different from the Latin or Indonesian consonants. This difference is found from the benchmark sound, as mentioned above, that Ngalagena is the sound of everything / / . Because Latin or Bahasa in Indonesia has different sounds for all consonants, such as B /bel/, F /ef/, H /ha/, L /el/, M /em/, N /en/, Q /q/, R /er/, S /es/, X /eks/, Z /zet/ . B2. Writing Differences in writing can also be found in the following example: Latin: Horse = K + U + D + Sundanes script: Kuda = KU + DA C. Ngalagena Form Characteristics ngalagena form itself mayorit Assalaamu'alaykum dulur Alhamdulillah we can re-update the training sundanes script, namely on Svaara or vocals. Let's go straight, okay, let's start first. The meaning of A. Swara Swara is a word or term in the Sundanes system, which means the wording and pronunciation of vowels. B. The difference between Swara Swara is very different from vocals in Bahasa Indonesia. These differences can be found in the classification and writing. B.1 Classification Classification, Swara Sundanes base has its own form of writing and differs from the consonants of sound. B.2 Writing Writing, Swara has its own rules and must be separated from the consonants chain. As in this example, Bahasa Indonesia will be found like this Budi = (B) Consonants + (U) Vowels + (D) Consonants + (l) vocals Nu Sundanes Base, said Budi does not contain vocals or Swara. Swara should be separated from cone, e.g.
